Nagercoil ,Tamil Nadu , India

SUMMARY

Full-Stack Developer with hands-on experience building scalable web applications using React.js, Next.js, and TypeScript. Proficient in responsive UI development with a strong focus on performance and code quality. Experienced in AI agent workflows and automation across the full software development lifecycle from requirement analysis to deployment. Passionate about delivering efficient, user-centric solutions and continuously exploring new technologies to solve real-world problems.

SKILLS

- **Frontend:** HTML5 | CSS3 | JavaScript | React.js | Next.js | Tailwind CSS
 - **Backend:** REST APIs | Prisma ORM
 - **Tools:** VS Code | Git | GitHub | n8n | Microsoft Office Suite | Vercel | Postman
 - **Languages:** Tamil (Native) | English
 - **Soft Skills:** Problem Solving | Critical Thinking | Teamwork | Time Management
-

PROFESSIONAL EXPERIENCE

MATT ENGINEERING SOLUTIONS, NAGERCOIL

June 2025 – Present

Full-Stack Developer

- Developed responsive web applications using React.js and Next.js
- Integrated REST APIs and managed data for dynamic applications
- Collaborated with team members to build clean and user-friendly interfaces
- Optimized application performance and ensured cross-browser compatibility

WENOXO TECHNOLOGIES, NAGERCOIL

Feb 2025 – March 2025

Software Tester

- Executed manual test cases and identified software defects
- Performed functional, regression, and usability testing
- Reported bugs and collaborated with developers to improve product quality
- Prepared detailed test reports and documentation

EDUCATION

Bachelor of Engineering in Computer Science and Engineering

2021 – 2025

Rohini College of Engineering & Technology, Palkulam, Kanyakumari

CGPA: 7.9

PROJECTS

Blockchain-Based Academic Certificate Verification System

Tech Stack: React.js | Next.js | TypeScript | Solidity | Ethereum | Ganache | Truffle

- Developed a secure system to verify academic certificates and prevent forgery
- Implemented Merkle Tree structure for efficient and tamper-proof data validation
- Built smart contracts using Solidity to store and verify certificate data
- Designed modules for CSV upload, batch processing, and certificate management
- Created QR-based verification system for instant certificate validation

Promark - Blockchain Proximity Marketing

Tech Stack: React.js | TypeScript | Next.js | Solidity | Ethereum | Ganache | Truffle

- Developed a blockchain-based advertising platform with role-based dashboards
- Implemented secure promo token system for advertisement validation
- Designed one-time redemption mechanism to prevent duplicate usage
- Ensured transparency and security using blockchain technology
- Built user-friendly interfaces for campaign management and tracking

Office Billing System

Tech Stack: Next.js | TypeScript | PostgreSQL | Prisma | pdf-lib | CallMeBot API

- Built a full-stack billing system to manage and track student project invoices.
- Generated branded PDF invoices with company logo and signature using pdf-lib.
- Integrated WhatsApp API to send automated invoice notifications to students and admin.
- Built REST API routes for billing entry creation, retrieval, and PDF export.
- Implemented secure login and registration to restrict unauthorized access.
